

When the world stayed home by Howie 😊😊

At first everything was normal. Mum and daddy went to work and I went to school.

But then a nasty virus made lots of people ill ☹️. The virus spread by people coughing and sneezing on each other.

The Prime minister said “wash your hands often and sneeze in your elbow.”But the virus was still spreading so we all had to stay at home ☹️☹️☹️!

Prime Minister of the United Kingdom

Royal Arms of Her Majesty's Government

This meant mummy and daddy didn't go to work and we didn't go to school so the virus couldn't spread.
